QA Automation Engineer | UI & API Test Frameworks | Web & Mobile Testing | SaaS Quality Engineering

PROFESSIONAL SUMMARY

QA Automation Engineer with over 6 years of experience designing and scaling automated test frameworks for SaaS web and mobile applications. Proven expertise in building UI and API automation using Playwright, TypeScript, Selenium, and Postman, integrating test suites with CI/CD pipelines, and collaborating with cross-functional Agile teams to accelerate releases and deliver reliable, user-focused software.

CORE COMPETENCIES

Test Automation & Framework Design: UI Test Automation (Playwright, Selenium), API Automation & Integration Testing (Postman, Newman, REST, GraphQL), Mobile Application Testing (iOS / Android), Framework Architecture & Reusable Automation Components, Regression, Functional & Performance Testing, TestNG, JUnit, Allure Reporting, Cross-Browser & Multi-Platform Testing

Agile Delivery & Quality Assurance: Test Strategy & Comprehensive Test Plans, Defect Lifecycle Management (Jira, X-Ray, Zephyr), Root Cause Analysis & Diagnostic Troubleshooting, Production Deployment Verification & Release Readiness, Cross-functional Collaboration (Product, Dev, Design), Mentoring & Technical Leadership

Cloud, DevOps & CI/CD: CI/CD Test Integration (GitHub Actions, Jenkins, Azure DevOps), AWS Cloud Services (Cognito, S3, AppSync, Lambda, EC2), Containerization & Orchestration (Docker, Kubernetes), Version Control & Code Reviews (Git, GitHub)

AI & Modern Quality Engineering: AI-Assisted Test Automation, AI Agents & Prompt Workflows (Claude, Antigravity), Automated Workflow Acceleration, Continuous Testing & Defect Detection Optimization

API, Security & Backend Testing: REST & GraphQL API Validation, Database Testing & Verification (PostgreSQL, MongoDB, SQL Server), Security Testing (Authentication, Authorization, MFA, SSO)

PROFESSIONAL STRENGTHS

Scalable Test Automation Frameworks: Proven track record of architecting and building robust UI and API automation frameworks from scratch using Playwright, Selenium, Java, TypeScript, and Postman.

Agile Leadership & Mentorship: Proactive collaborator in sprint planning and risk assessment, with a strong history of mentoring engineers and driving quality best practices.

Comprehensive Defect Management: Skilled in writing clear, reproducible defect reports, tracking issues through Jira, X-Ray, and Zephyr, and ensuring complete regression verification.

AI-Driven QA & Tooling: Pioneered AI-agent workflows and LLM-assisted testing tools to accelerate test case design, automate repetitive tasks, and speed up regression cycles.

PROFESSIONAL EXPERIENCE

Automation Specialist – Plato Nov 2025 - Feb 2026

- Built UI and API automation framework using Playwright integrated with AI agents, reducing test development effort and accelerating regression coverage.
- Designed reusable AI-agent skills and workflows to accelerate test-case creation, automation development, and validation of new application features.
- Mentored junior engineers in automation and AI-driven testing practices.

- Presented project outcomes to the entire company, receiving formal recognition and being featured in the company newsletter for project contributions.

QA Engineer – Nutrien *Jun 2025 - Nov 2025*

- Designed and executed test scenarios to validate business requirements and ensure workflow reliability of mission critical mining applications.
- Automated REST APIs with Postman, reducing manual API validation by 50%.
- Validated backend integrations using AWS services and Postman.
- Performed web and mobile testing (iOS/Android), improving release stability and reducing post-release defects.
- Mentored three QA engineers in API testing and test automation.

Test Automation Specialist – Plato *Mar 2025 - Jun 2025*

- Led the design of a scalable Selenium-based UI automation framework using Java.
- Automated 10+ end-to-end UI flows and validations, significantly reducing manual QA effort.
- Integrated CI/CD pipelines with GitHub Actions and configured Allure reports.
- Mentored two QA engineers in UI automation, reviewed pull requests on GitHub, and managed code merges to maintain quality and consistency.

Test Automation Specialist – Employment and Social Development Canada *Jan 2025 - Mar 2025*

- Designed and implemented end-to-end automated tests for dual-interface government applications using TypeScript and Selenium.
- Enhanced the existing UI automation framework by cutting manual testing efforts by 45%.
- Collaborated with 8+ engineers to align automation coverage with complex employment insurance related workflows.
- Developed automated security test cases for user authentication workflows across multiple platforms, including Service Canada and other provincial service portals.
- Partnered with product and engineering leaders to align quality goals with release timelines.

QA Engineer – AMD Silo AI *May 2023 - Dec 2024*

- Implemented a reusable automation framework that supports both GraphQL and REST APIs for both offline and online systems, reducing the overall test automation effort by over 50%.
- Created GraphQL API automated tests to ensure backend reliability reducing regression execution time by 70%.
- Worked extensively with AWS services including Cognito, S3, AppSync, and Lambda to validate 15+ backend workflows and resilience.
- Devised comprehensive test plans and executed test cases while tracking and validating defects through X-Ray and detailed Jira tickets.
- Drove Agile QA processes in sprint planning, identifying potential risks early in the development lifecycle supporting biweekly deployments.

Software QA Engineer – Imperva *Jun 2021 - Nov 2022*

- Performed Functional, Exploratory, Regression, Browser Compatibility, GUI testing of an industry-leading Cybersecurity product - Data Security Fabric.
- Reduced manual API testing by 80% through automation.
- Built hybrid automation framework using Selenium, Java, and TestNG, increasing automation coverage by 30%.

- Created 8+ custom automation scripts to reduce manual steps and streamline expected results using Shell scripts, APIs and SQL queries.

TOOLS & TECHNOLOGIES

Test Automation: Playwright, Selenium, Postman, Newman, Allure, JUnit, TestNG

Languages: TypeScript, JavaScript, Java, Python, Bash, SQL

API Testing: REST, GraphQL, Postman, Newman, AppSync

Cloud & DevOps: GitHub Actions, Jenkins, Azure DevOps, AWS, Docker, Kubernetes

Databases: PostgreSQL, MongoDB, SQL Server, AWS DocumentDB, AWS Redshift

AI and Automation: AI-Assisted Test Automation, AI Agents, Claude, Antigravity

Tools & Collaboration: Jira, X-Ray, Zephyr, GitHub, VS Code, Figma, PowerShell

EDUCATION

Master of Science - Computer Science – Western University (Dec 2020)

Bachelor of Technology – M.S. Institute of Technology (Jun 2018)
